

Please do not consider weakening our state's Do Not Call Law (Wisconsin). Consumers have been thrilled by the effect that the current WI law has had. I especially think of the seniors in WI, the people who probably get the lion's share of these telemarketing calls. My own parents were getting several unsolicited sales calls every day and it was one of their largest sources of aggravation.

The WI No Call law provides a great service to our citizens. Businesses survived and flourished long before direct market was born, they'll have to find a way to survive in it's absence. Please do not interfere with a state's right to govern itself. We are after all, the United States of America. We are still a democracy.
